University Social Responsibility

The University of Jaén maintains as an intrinsic element of its Mission, Vision and Values ??social responsibility and commitment to promoting and collaborating in the development of the SDGs in the region in which it is located.

Commitment is at the highest level of the strategy, being one of the cross-cutting axes of the University of Jaén's Strategic Plan, focusing specifically on the strategic objective: "To strengthen the university's social commitment by implementing the SDGs at all levels of university activity." In turn, these strategic objectives are deployed in several relevant plans:

Finally, recently, the alignment of university activity with the Ten Principles of the Global Compact, to which the UJA has adhered since September 2009, has been intertwined with the institution's commitment to the Sustainable Development Goals (SDGs) of the UN's 2030 Agenda.
