

Spin-offs

The creation of companies based on the knowledge from university activity, known as Spin-offs, is currently one of the main creation mechanism of competitiveness and renewing the productive fabric of the most developed countries in the world.

The companies founded by the university research activity expect to transform the results and capabilities derived from research into processes, products and services with added value, transforming part of the research into business value.

CEATIC is conscious of this reality and wishes to contribute to its development as one of the ways to make possible the social and economic exploitation of its capabilities and research results.
