Hesitant Fuzzy Linguistic Term Sets for Decision Making

Rosa M. Rodríguez, Luis Martínez, Francisco Herrera

2011, IEEE Transactions on Fuzzy Systems - Article

Dealing with uncertainty is always a challenging problem, and different tools have been proposed to deal with it. Recently, a new model that is based on hesitant fuzzy sets has been presented to manag... [more](#)

The screenshot shows a Google Scholar search interface. The Google logo is on the left, followed by a search bar and a blue search button. Below the search bar, the text 'Académico' is on the left, and 'Aproximadamente 101 resultados (0,03 s)' is in the center, circled in red. Below this, the section 'Artículos relacionados' is on the left. The first result is titled '[LIBRO] Violence against women: the hidden health burden' by LL Heise, J Pitanguy, and A Germain, published in 1994 on agris.fao.org. The abstract describes gender-based violence as a public health problem. The citation count is 828. A red box highlights the link 'Artículos relacionados'. Other links include 'Las 4 versiones', 'Citar', 'Guardar', and 'Más'. The second result is titled 'Violence against women: a neglected public health issue in less developed countries' by LL Heise, A Raikes, CH Watts, and AB Zwi, published in 1994 by Elsevier. The abstract describes violence against women as a public health issue in both industrialized and less developed worlds. The citation count is 345. A red box highlights the link 'Artículos relacionados'. Other links include 'Las 12 versiones', 'Citar', 'Guardar', and 'Más'.

Language Models are Unsupervised Multitask Learners

[Alec Radford](#), [Jeff Wu](#), [Rewon Child](#), [D. Luan](#), [Dario Amodei](#), [Ilya Sutskever](#) · Computer Science · 2019

TLDR It is demonstrated that **language models** begin to learn these tasks without any explicit supervision when trained on a new dataset of millions of webpages called WebText, suggesting a promising path towards building **language** processing systems which learn to perform tasks from their naturally occurring demonstrations. Language Models are Few-Shot Learners

[Tom B. Brown](#), [Benjamin Mann](#), +28 authors [Dario Amodei](#) · Computer Science · NeurIPS · 28 May 2020

TLDR GPT-3 achieves strong performance on many NLP datasets, including translation, question-answering, and cloze tasks, as well as several tasks that require on-the-fly reasoning or domain adaptation, such as unscrambling words, using a novel word in a sentence, or performing 3-digit arithmetic. Transformer-XL: Attentive Language Models beyond a Fixed-Length Context

[Zihang Dai](#), [Zhilin Yang](#), [Yiming Yang](#), [J. Carbonell](#), [Quoc V. Le](#), [R. Salakhutdinov](#) · Computer Science · ACL · 9 January 2019

TLDR This work proposes a novel neural architecture Transformer-XL that enables learning dependency beyond a fixed length without disrupting temporal coherence, which consists of a segment-level recurrence mechanism and a novel positional encoding scheme. [Expand](#)

This paper investigates 3,073,351 citations found by these six data sources to 2,515 English-language highly-cited documents published in 2006 from 252 subject categories, expanding and updating the largest previous study. New

for journal publications.

By 1950, it has been estimated that there were around 10,000 journals worldwide, and by 1980, that estimate grew to 62,000 (Meadows, 2000). Derek de Solla Price's influential analysis of scientific journals revealed exponential growth in journal publishing over the previous three centuries, with a doubling time of around 15 years (de Solla Price, 1963). More recent analyses confirm the exponential growth trend but vary in their estimates of both current and historical growth rates. One identifies several distinct phases of growth, of which the most rapid has occurred since the mid-twentieth century (Bornmann & Mutz, 2015).

Since the 1970s, the wider availability of databases (such as the pioneering Science Citation Index) has moved the focus of analysis from numbers of journal titles to counts of articles and of the citations they gather. These, too, show the growth of published research.

The increasing output of academic publishing during the 1950s and 1960s coincided with the expansion of universities and the availability of generous funding for core functions such as libraries. By the 1980s, the contraction of core university funding meant libraries were unable to keep up with the growth in academic publishing. This became widely known as the 'serials crisis' (Douglas, 1990), although, as libraries diverted funds to journal budgets, it seemed to some more of a 'monograph crisis' (Thompson, 2005).

Now, we will discuss the key elements of this story in more detail:

Juan Miguel Fernández-Alvira

answered a question related to Physical Activity

Have you used cut-points for wrist-worn actigraph measuring physical activity in children?

Question

14 Answers

Helen Quirk

I've measured physical activity in children aged 9-11yr using wrist-worn actigraph (3gtx+) and wondered if anyone had explored cut-points for activity intensities?

Las claves del éxito

**Acertar en la
elección del tema y del tutor**

Elegirás un tema que realmente te guste

Me gusta

- **Elígelo cuanto antes mejor, si ya tienes claro qué temas te gustan.**
- **Observa y analiza con atención las asignaturas tratadas en los cursos del máster. Ahí están el vivero de ideas**

2. Elegirás un buen director...un maestro

Debes elegir como director de tesis a una persona que te dedique tiempo, que sea simpático (que tengas feeling con él), que sea competente científicamente hablando (que sepa del tema, vamos... es fácil comprobarlo) y si posee autoritas y potestas académica mejor que mejor

A close-up, slightly low-angle shot of Yoda's face. He has a green, wrinkled complexion with large, expressive blue eyes. His ears are prominent and pointed. He has a slight, knowing smile on his face. The background is dark and out of focus.

**Te dedicará tiempo para enseñarte a investigar
Te propondrá un tema sugestivo
Te orientará para que no te pierdas
Te animará cuando desfallezcas
Te ayudará a buscar tu camino**

Para terminar...

un par de consejos

Que esté acompañado de un buen grupo de investigación

Júntate con gente que se haga preguntas, o mejor aún, que se haga buenas preguntas

Un buen grupo es como un terreno fértil

Si el grupo es malo hasta las buenas semillas mueren

Si el grupo es bueno hasta las malas semillas son capaces de florecer

Continuidad

Coherencia

Perseverancia

Esfuerzo
