

GROUP FQM-152

SIMULATION AND CHARACTERIZATION OF MATERIAL SYSTEMS

PI:

Antonio Ángel Moya Molina

Principal Investigator

Members:

- Francisco José Arroyo Roldán

- José Horno Montijano

- José Juan López García

- Manuel Quesada Pérez

- María del Mar Ramos Tejada

Technical staff:

- Antonio José García Rodríguez

Administrative staff:

- Francisco Javier Ibanco Arnaldo

Research Lines:

- Characterization and performance evaluation of batteries and supercapacitors.

- Simulation of ion transport processes in electrochemical cells, ion-exchange membrane systems, and colloidal systems.

- Condensed Matter Physics: Electronic properties of materials, surfaces, interfaces, nanostructures...
