

GROUP FQM-152

SIMULATION AND CHARACTERIZATION OF MATERIAL SYSTEMS

PI:

Antonio Ángel Moya Molina

Principal Investigator

Members:

- Francisco José Arroyo Roldán
- José Horno Montijano
- José Juan López García
- Manuel Quesada Pérez
- María del Mar Ramos Tejada

Technical staff:

- Antonio José García Rodríguez

Administrative staff:

- Francisco Javier Ibancos Arnaldo

Research Lines:

- Characterization and performance evaluation of batteries and supercapacitors.
- Simulation of ion transport processes in electrochemical cells, ion-exchange membrane systems, and colloidal systems.
- Condensed Matter Physics: Electronic properties of materials, surfaces, interfaces, nanostructures...
