Healthcare services

The Spanish National Social Security System guarantees access to healthcare and medication for people insured by the system and their dependants at the following two levels:

Types of health care

	Scope	Location	Provider
Primary care	By making an appointment online/by telephone Health promotion service and prevention of common health issues	At the health centre closest to the patient's home	General practitioners, paediatricians, nurses, administrative staff, midwives and physiotherapists
Secondary care	Via referral from primary care Diagnosis, surgery and therapeutic treatment	At diagnostic centres and hospitals in Jaén province	Specialist doctors, technicians, administrative staff, 24-hour emergency staff

Healthcare servicesEn Andalucía, la estructura administrativa y de gestión de apoyo al Sistema Nacional de la Seguridad Social se denomina *Servicio Andaluz de Salud (SAS)*, cuya sede central está en Sevilla.

In Andalusia, the administrative body managing the National Social Security System is called the Andalusian Health Service (SAS), which is based in Seville.

The online platform SAS ClicSalud+ is a useful tool that allows you to make an appointment with your general practitioner, complete various administrative procedures and consult your medical history. The SAS operates a series of secondary care facilities, which include:

Health centers in the province of Jaén

Jaén	Linares
Jaén Hospital Diagnosis and Treatment Centre	San Agustín Hospital
Jaén University Hospital	
Doctor Sagaz Hospital	
Jaén University Hospital General Hospital	
Jaén University Hospital Women's and Children's Hospital	
Jaén University Hospital Neurotraumatology Hospital	

Researchers who do not meet the requirements for coverage by the Social Security System and need private insurance may be referred to Clínica Cristo Rey (Jaén) or Liclinic (Linares). It is important to bear in mind that some insurance companies impose a qualifying period so you cannot use their services immediately.
