Funding opportunities

Funding opportunitiesNumerous funding opportunities are available to researchers, including those listed on the EURAXESS Portal. There are also many funding programmes to allow you to continue your research career in Europe and beyond, as the website for the OFIPI at UJA explains (FAQs section).

One of the most prominent postdoctoral funding programmes in the EC Framework Programme, open to researchers from any field in any part of the world, is the Marie Sk?odowska-Curie Actions – Postdoctoral Fellowships. These Actions are divided into European and Global Fellowships.

European Fellowships are intended for researchers who wish to move within Europe and for researchers from any part of the world who travel to Europe. Global Fellowships offer funding to researchers based in the EU or associated countries for stays outside Europe, as long as they return to the European Union (or an associated country) at the end of their stay.

I am interested in researching abroad, what are the funding opportunities?

Currently, the MSCA-PF panels are:

MSCA-PF panels

MSCA-PF panels
Chemistry (CHE)
Social Sciences and Humanities (SOC) Economic Sciences (ECO)
Information Science and Engineering (ENG)
Environment and Geosciences (ENV)
Life Sciences (LIF)
Mathematics (MAT)
Physics (PHY)

The annual fellowships cover costs for maintenance, travel and family obligations. The European Union also offers funding for training, networking and research costs, as well as for management expenses and indirect costs.
