11F 2025

In commemoration of the International Day of Women and Girls in Science, a day-long event was held with the participation of students from schools and institutes. Various science outreach activities were organized by the University of Jaén. Throughout the morning, several educational and participatory workshops were held, aimed at fostering an interest in science from an early age and highlighting the role of women in different scientific fields.

Among the workshops offered were *"Women in the Laboratory ,"* focused on basic experimentation for preschool students; *"Experiments, Games, and Movement: Equality and Science for a Sustainable Future ,"* with playful activities to introduce science through play; and *"Create Your Own Rainbow Yogurt!"* focused on fermentation and biomass. Other activities included *"Exoplanet in a Box ,"* to discover the universe; *"Basic Life Support Workshop ,"* geared towards health; and *"Science Explorers ,"* with hands-on laboratory experiences.

The program was complemented by other initiatives on artificial intelligence, microbiology, archaeology, the environment, and the history of women in science, offering a wide variety of experiences adapted to different educational levels. Overall, it was a dynamic and educational day that combined learning, experimentation, and raising awareness about equality.
