11F 2024

The University of Jaén held an event on the Jaén campus to mark the International Day of Women and Girls in Science, which included an institutional reception, a special radio program and a welcome ceremony with academic speeches and an informative talk on artificial intelligence.

Later, the primary school students participated in the activity 'A Day with a Scientist,' which included various hands-on and interactive workshops designed to foster interest in science and highlight the role of women in science. Highlights included the 'DolEmos' project on pain research, activities focused on the Sustainable Development Goals through games, applied science workshops such as *"pH Rainbow,"* and initiatives centered on art, museums, and the role of women in different disciplines. Overall, the day combined outreach, experimentation, and raising awareness about gender equality.
