Research and business support

Lines of research

Lines of research_

ADOTEC has been developing, for more than 15 years, two lines of research focused on the mechanisms to achieve efficiency, flexibility and agility at a business and supply chain level and on the impact of Information Technologies.

Research projects

Research projects_

ADOTEC has developed seven competitive research projects, funded by international, national and regional organisations. These projects have been related to different industrial sectors such as aeronautics and the automotive industry.

Service provision

Service provision_

ADOTEC carries out technology transfer actions through the provision of services to companies, with the aim of promoting the development and growth of companies in different industrial sectors.
