Service Provision

Logo B-N

ADOTEC, within its main lines of research, carries out technology transfer actions through the provision of services to companies, with the aim of promoting the development and growth of companies in different industrial sectors, through the implementation of specific projects related to Operations Management and Technology Management that value the knowledge and experience of the different members that make up the research group.

In this sense, at the applied research level, the group has developed more than 20 knowledge transfer contracts in recent years and has participated in expert groups in consultancy on management systems in the automotive industry, implementation of methodologies and digital technologies in the oil and gas, medical device manufacturing, aeronautics and naval industries.

Due to the multidisciplinary nature of the group, the specific actions of business support services that the group can carry out are very diverse, both in the field of Economics and Business Sciences and in the field of Engineering.
Among the productive sectors to which the services are directed, the following stand out:

- Automotive industry
- Aeronautics
- Information and Communication Technologies
- Biotechnology and Health
- Logistics
- Agri-food
- Energy, Environment and Water
- Management and Business Services
- Infrastructure and Transport
- Materials and Construction
- Industrial Production
- Oil and Gas Industry
- Medical Device Manufacturing
- Corporate Sustainability
