

Service/Technology: Consultancy work for the implementation of interoperability, visual management and artificial intelligence in enterprises.

Logo B-N

Research and development of diagnostic, planning and implementation of technologies with format-neutral standards and syntactic interoperability protocols. Development of semantic interoperability practices, considering ontologies, triple database and artificial intelligence of processes, projects and products for digital knowledge engineering in companies. Development of visual management practices to analyse the results obtained from integration through syntactic and semantic interoperability.

Production sectors

- Information and Communication Technologies
- Biotechnology and Health
- Agri-food
- Energy, Environment and Water
- Management and Business Services
- Infrastructure and Transport
- Materials and Construction
- Industrial Production

Key words

- Digital Transformation
