La sesión se impartirá en inglés

Title Research techniques using advanced database tools with the EBSCOhost interface

Date and time: 26 de octubre 2026 16:00

This session is intended for anyone involved in scientific research or currently enrolled in a master's program. We will present all the databases available at the University through the CBUA. Participants will learn how to conduct searches using the advanced research support features available in the EBSCOhost interface, including exporting results, saving searches and records, creating alerts, using search options, combining searches, reviewing search history, and managing an EBSCO Passport account.

Duration: 75 minutos
