

HUM-653 Didactic Innovation in Physical Activity

Coordinator: Dr. M^a Luisa Zagalaz Sánchez (lzagalaz [arroba] ujaen [punto] es)

The group has been established since the year 2000 and has gone through several stages that have allowed it to adapt to the teaching staff, students and researchers at all times. Currently, the Group is specialized in Didactics of Physical Education and Sport and all the characteristics that surround it, mainly teacher formation. Worthy of note is the work carried out by some of its members in Town Halls through sports management - with families through psychomotor education such as children's physical activity shared with the parents; and our presence in South America and Europe.

Research lines

- Didactics of physical education and sport (Physical activity and health; Women and physical activity; Alternative sports; Sports management; Children's physical education - Psychomotor education; Coeducation)
- Innovation and creativity in education
- Teacher training. Psychosocial factors
