

HUM-883 Cognition, Development and Education

Coordinator: Dr. Santiago Pelegrina López (spelegri [arroba] ujaen [punto] es)

Our group researches human cognition and, particularly, memory and certain cognitive processes relating to learning difficulties. We especially seek to understand how memory changes over a lifetime, how certain cognitive abilities impact on academic performance and to what extent they can be improved.

Research lines

- Development of memory
- Cognitive processes that intervene in learning to read
- Cognitive and emotional processes that intervene in the learning of mathematics
- Cognitive training
