

## **RNM-325 Geological Processes and Resources**

**Coordinator :** Dr. Juan Jiménez Millán (jmillan [arroba] ujaen [punto] es)

### **Research lines**

- Mineralogy and evolution of soils in incipient stages
- Active tectonics and its influence on relief
- Geomorphology - morphogenetic processes and associated risks
- Modeling of geological and water resources
- Cenozoic structure and tectonics of the western Mediterranean
- Low-temperature petrogenetic processes
- Study and conservation of artistic heritage materials
- Mineralogical and technical study of industrial clays
- Alteration of proto-soil-generating silicate rocks
- Advanced materials and polymer-clay nanocomposites
