## **TEP-222 Materials and Mining Engineering**

Coordinator: Dr. Francisco Antonio Corpas Iglesias (facorpas [arroba] ujaen [punto] es)

The research conducted by the "Materials and Mining Engineering" research group has the goal of recovering residue for application or development of new materials.

## **Research lines**

- Advanced materials
- Construction materials
- Geological-mining heritage
- Materials Engineering
- Innovation

## **Related services and products**

- Fascine for vegetation regeneration
- Expanded clays
