

About us

The University of Jaén International Projects Office (**Oficina de Proyectos Internacionales**) was created in 2015 for promoting and encouraging the participation of UJA Research Groups in International Research and Innovation funding programs. We act as a contact point for our researchers to provide technical and administrative support in the identification of research opportunities, elaboration of project proposals, partner search or legal and financial advice during the project development phase. Besides, we act as a contact point for all academic and non-academic parties that would like to collaborate with UJA researchers for implementing a joint R&I international project proposal within the framework, for instance, of [Horizon Europe](#). Please, find below our **contact details**:
