Year	Statement
2021	<p>GENERAL NOTE AFFECTING TO ALL SDGs: Quantitative data refer to the course indicated in the methodology. The data are homogenized and obtained from the information system of the competent Ministry in universities (integrated system of university indicators), or from the Institutional Information System for the supply of data and statistical information of the UJA. Qualitative information has been evidenced through data, newsletter, documents and publications. All of them link to the University's web pages. The specific page within the document where the relevant information is placed has been included in the comment to facilitate its localization.</p> <p>SDG1. 1.2.1. Proportion of students receiving financial aid to attend university because of poverty. This includes FTP students supported in internal, international and incoming mobility programmes. We compute according to the criteria of developing countries (low and lower middle income countries). For the computation of 2020 and 2021, a special Covid 19 support programme has been included for the provision of computers for students with limited financial situations. The breakdown is as follows: UJA students' own aid programme: 137. Aid for specific computer programme: 286. Aid programme for international students UJA: 50. SDG4-. 4.4.1 Proportion of first-generation student. SDG5 5.2.5. Proportion of first-generation female students. SDG10. 10.2.1 Proportion of first-generation students. Calculation of this indicator in 2021. It has been calculated by taking into account all students who start a degree program at the university, even if they come from another university. The calculation of first-generation students is calculated using direct data provided by the students. SDG5. 5.4.1. Proportion of senior female academics. general management positions and those in academic centres and departments, as well as those responsible for the management of academic programmes and research centres and groups. With regard to the total number of senior academic staff, it should be noted that many of the professors hold management positions, so the total number refers to senior positions and not to individuals. SDG6. 6.2.1 Water consumption tracking. Computes the total population of the two Campuses of the University of Jaén (It does not include the associated centre). Total full-time professors (own centers) 916. Total full time Staff (own centers) 534. Total Outsourced 178. TOTAL EMPLOYEES 1561. TOTAL STUDENTS 12595. TOTAL PEOPLE CAMPUSES JAÉN-LINARES 14223. SDG8. 8.3.1 Expenditure per employee. For the purposes of computing this indicator, the own staff and the outsourced staff of the University of Jaén's own campuses, as well as the budget allocated to this expense have been included. SDG9. 9.4.1 - Research income from industry and commerce. The total income from external sources to finance research activities in all modalities (by year of concession and total amount granted) is computed. In research contracts, the total is included, whatever the modality and scope (by amount settled in annual instalments). SDG10. 10.3.1 Proportion of international students from developing countries. Computes: The counting system has been revised and considers all students enrolled in the 2020-21 academic year at all academic levels and whose nationality is other than Spanish. Full-time equivalent students from countries classified by the World Bank as low-income and lower middle-income have been selected. These students receive aid from their countries for their studies or receive aid from the University of Jaén programmes. SDG10. 10.5 Number of employees with disability. Employees with disabilities working in the basic outsourced services have been included in this year's computation. SDG12. 12.3.2. Proportion of waste recycled. The hazardous and non-hazardous waste generated is included in the computation of total waste. They are included in the total of recycled waste (batteries, electronic devices, lamps, toner, paper and vegetable waste). The amount of waste sent to the landfill includes hazardous resources (collection and storage security system, and non-recycled plant residues. SDG13. 13.2.1 Low-carbon energy use. Computation includes: Renewable sources (biomass, hydroelectric energy, geothermal): 603. Sources of energy generation (wind, solar, nuclear): 350. Electricity (renewable): 8246. Electricity (nuclear): 1276</p>

Comment	<p>The University of Jaen promotes collaborative development of good practices in the implementation of the SDGs with the Spanish Network for Sustainable Development (Evidence 1, publication of good practices, Mobility Programme "Hack the City, page 60). International collaboration is developed through the projects contemplated in the Action Plan for International Cooperation in Development (Evidence 2, projects in 2021 aligned with SDGs). Through research projects, collaborations are carried out for the study and development of actions for the implementation of the SDGs (see evidence 13.3.4 for linking research projects to SDGs). We highlight as an example of research project (European Union) the "Study on solar and wind energy at national level to determine the spatial distribution and optimal number of solar plants and wind farms in order to obtain an electricity system based on renewable energies in the future). Evidence is public (website).</p>

Comment	The University of Jaén has adopted the commitment with SDG in its III Strategic Plan 2021-25, in the educational strategic objective: "To incorporate the Sustainable Development Goals in the teaching of bachelor's and master's degrees, professional internships, university programme for seniors and in lifelong learning". It is extended to all programmes and curricula of the degrees offered (see in evidence 1, point O13, page 23). Inclusion of: O6.3. "Coordinate further education, volunteering and development cooperation in the achievement of the SDGs in a strategy that combines the attraction of talent and collaboration with developing countries with the comprehensive training of the student body". (See evidence 1, page 40). The evidence is public (website).	
Does your university as a body have dedicated courses (full degrees, or electives) that address sustainability and the SDGs?	Yes	-

Comment	The University of Jaén runs specific courses on SDGs, for example, the "University Extension Diploma on Sustainable Development Goals (SDGs): towards a comprehensive training of students", offered openly (Evidence 1). Another example: Course "Human rights and the SDGs in the framework of international development cooperation. 1. There are numerous specialisation and complementary training degrees in SDG-related subjects, which can be consulted in with links to Master's degrees, specialisation diplomas and postgraduate diplomas (see links at <a href="https://www.ujaen.es/estudios/oferta-academica/titulos-propios">https://www.ujaen.es/estudios/oferta-academica/titulos-propios</a> ). In addition, the supply of official postgraduates have a clear focus on SDGs 2,3,5,7,10,13,15 and 16. For example, Master's Degree in Renewable Energies; Master's Degree in Analysis, Conservation and Restoration of Physical and Biotic Components of Habitats or Master's Degree in Photovoltaic Systems Engineering (see in second evidence in the document Master's Degrees/ODS).	
Does your university as body have dedicated outreach educational activities for the wider community, which could include alumni, local residents, displaced people?	Alumni, local community, displaced people and refugees	-

Comment	The University has set a target for the duration of studies to obtain the degree of 40% in a period of no more than 5 years for four-year degrees. A comparison is made between the average duration of the total number of students (4.73 years) and that of students with grants and financial aid, which is (4.64 years). In both cases 40% of the target is exceeded (first evidence). In order to ensure that students do not drop out or that they are prevented or hindered from carrying out and completing their studies for economic reasons, the University of Jaen has established its own plan for urgent social aid for students, which is announced every year (Evidence two, see last call). The evidence is public (web pages).

Comment	The University of Jaén has support programmes for international students coming from economically disadvantaged countries. For example: Women for Africa Programme. Aid programme for refugee students. Programme for postgraduate students from Latin American countries. Talent Attraction Grants. All the aid programmes can be consulted in the drop-down links in the first evidence. In indicator 1.2, full-time equivalent students from low and lower-middle income countries with grants have been computed as a result, in total seven international grants programmes are financed with the University of Jaén's own funds. The aid programme for refugees from countries in conflict has been running since 2016 and was presented by the University of Jaén at the United Nations (UN) and continues its application (second evidence, example of last call). The evidences are public (web pages).

Comment	<p>The policy for women's access to the University is established in the Equality Plans approved by the Governing Council. The aim of this policy is to avoid gender imbalance in the areas of activity of the UJA. In the student sector, actions are established to avoid horizontal gender segregation by branches of knowledge and degrees. The latest approved Plan is 2021-2023 and is public (first evidence). The scope of the policy can be found in evidence two (pages 5 and 16). The Equality Plans monitor the implementation of the actions (See in first evidence Evaluation of the II Plan for Effective Equality between Women and Men of the University of Jaén (2016-2019). Comment	The III Plan for Equality and Integration of Sexual and Gender Diversity at the University of Jaén (2021-2023) has reinforced the policies of respect and integration of sexual, bodily and gender diversity in university activity, by means of a set of actions whose objectives determine the policy of the Institution (See in the first evidence, page 24 and following). The policy against discrimination of transgender people is integrated in the Protocol for the prevention of and action against sexual harassment based on sex, sexual orientation, gender identity or gender expression, approved by the Governing Council in 2021 (Second evidence). An example of application is the programme for the reception of foreign students from the LGBTBI community who are persecuted in their country for this reason. Evidence is public (web pages).

Comment	The University of Jaén has established reconciliation, co-responsibility and equality policies in the Plans for Effective Equality between Women and Men of the University of Jaén, minimizing, as far as possible, the negative impact that the exercise of family responsibilities could have on the professional trajectory of people. The measures implemented can be consulted in the III Master Plan for Equality and Integration of Sexual and Gender Diversity at the University of Jaén (2021-2023) in objective IDO3. Establish policies that guarantee co-responsibility (first evidence). In addition, the reconciliation leaves (maternity, adoption, paternity, breastfeeding) established in the Public Employee Statute (article 49) and in internal regulations (second evidence) are applied. Comment	<p>The University of Jaén carries out the monitoring and detailed study of water consumption in all its campuses and buildings. In the first evidence is all the information on the management and control of water consumption in buildings and infrastructures. In the second evidence you can see the detailed report on water consumption. It also measures the rainwater collected at the Linares Campus which is accumulated in a cistern of 1,000,000 litres, and used both for watering gardens and for filling toilet cisterns. Rainwater collected from the Jaén Campus football pitch is fed into a 150,000-litre cistern for garden irrigation. (the first evidence). Evidence is public (web pages).</p>

Comment	<p>The water supply at the University of Jaén comes exclusively from the town network. Additionally, in compliance with the regulations for the prevention and management of legionellosis, all water supply systems in buildings have: 1. Mechanical filters according to standard UNE-EN 13443-1. 2. A system of check valves, according to the UNE-EN 1717 standard, that avoid water returns due to loss of pressure or decrease in the supplied flow and especially, when necessary to avoid mixing of water of different circuits, qualities or uses. 3. Periodic bacteriological analysis. In the first evidence you can see the planning and Systems Maintained for the Prevention and Control of Legionellosis at UJA. In the second evidence you can see in detail the development of the programme. Evidences are public (web pages).</p>

Comment	The University of Jaén has a project to improve the management of Green Infrastructure which is being developed through the Tree Management Plan. (See in the first evidence the Project to improve of green infrastructure and the link to the Urban Tree Management Plan). Goals include the "avoided runoff" with trees. In particular, Goal 9 on the choice of species in keeping with nature includes the use of low water-consuming species. It is complemented by Goal 5 on optimisation of water resources (Evidence three). Evidence is public (web pages).

Comment	The University of Jaen includes in its Environmental Sustainability Policy Statement "To promote the saving of natural resources, raw materials and energy, rationalising consumption by adopting the necessary measures" (First evidence). In the Strategic Plan of the University of Jaen (2021-2025), a policy has been formulated in Objective O6.2. Develop environmentally responsible policies that prioritise the use of clean energies and the creation of a sustainable environment. The Environmental Sustainability Master Plan of the University of Jaén, 2021-2023, has established the policy related with clean water and sanitation in objective 6 aiming to improve water and sanitation management (second evidence, page 5 and following). In the Project to improve the management of Green Infrastructure, Objective 5 "Optimisation of water resources" includes the use of irrigation with previously recovered rainwater. Evidence is public (web pages).

Comment	In the Linares Campus Technology Park, all rainwater from roofs and drains is collected for irrigation systems and cisterns. In this way, at least 1,150 cubic metres are reused annually (this is the capacity of the Campus rainwater tank). Rainwater collected from the Jaén Campus football pitch feeds a 150,000 litre cistern used for garden irrigation. The gray water generated in the University Housing building is reused to supply the toilet cisterns. In the evidence you can see the explanations of water reuse and the measures. ). Comment	The policy has been updated in the Environmental Sustainability Master Plan of the University of Jaén 2021-2023. It develops a strategic objective No. 4 to Consider environmental criteria in the planning and management of infrastructures (First Evidence). For the implementation of this policy, the Regulation on Thermal Installations in Buildings and the Technical Building Code (Energy efficiency and safety that must be met by thermal installations in buildings intended to meet the demand for well-being and hygiene of people, during their design and sizing, execution, maintenance and use) were applied. Also, Directive (EU) 2018/844 of the European Parliament and of the Council of 30 May 2018 amending Directive 2010/31/EU on the energy performance of buildings and Directive 2012/27/EU on energy performance were taken into consideration (Second evidence, you can see the links to the applied standards). Evidence is public (web pages).

Comment	The University applies the Operational Plan for Savings and energy efficiency of buildings and facilities. Through this plan, all the University buildings have been certified in energy efficiency. The issuance of official certifications includes plans for improving energy efficiency. In the first evidence, the certification dates and the improvement measures carried out in the facilities and buildings in the 2013-2020 period can be compared. As an example, the certification of the A2 building is provided, the improvement plan is included on page 18 (Second evidence). Evidence is public (web pages).

Comment	<p>The University of Jaén develops projects aimed to reduce carbon dioxide emissions. It can be seen in detail on the website Energy Efficiency and Sustainability (SDG) UNIVERSITY INFRASTRUCTURES FOR SUSTAINABLE DEVELOPMENT (First evidence). Among all the projects, the following stand out: 1. Installation project for the production of photovoltaic solar energy at the University of Jaén: contract with the company Endesa Energía S. A for the exploitation of the public concession of the roofs and parking lots of the University of Jaén for the installation of production plants of photovoltaic solar energy at the Jaén and Linares Campuses (Second evidence). 2. Project to improve the management of the Green Infrastructure developed through the Tree Management Plan (see link in first evidence). 3. Criteria for the design of new buildings (evidenced in the previous metric). Evidence is public (web pages).</p>

Comment	The University of Jaén includes in its policy Policy Statement on Environmental Sustainability to establish a management system to prevent, reduce and eliminate the environmental impact derived from its university activity, as a sign of its commitment to the prevention of pollution and the continuous improvement of our environment. Promoting the saving of natural resources, raw materials and energy, rationalizing consumption (First Evidence). This policy has been revised in the Environmental Sustainability Master Plan of the University of Jaén 2021-2023 (First Evidence, page 4). In application of this policy, consumption of electrical energy from polluting sources is reduced by the production of clean energy in new buildings (Biomass, solar thermal and solar photovoltaic) that will allow a saving in the emission of approximately 1,283 tons of CO2 per year, which which is equivalent to the planting of about 71,376 trees (Second and third evidence). Evidence is public (web pages).

Comment	<p>The University of Jaén uses two mechanisms to collaborate with the local community on the importance of energy efficiency and clean energy. 1. By carrying out research and consultancy contracts at local level, e.g. "Development of an advanced analysis system to add solar photovoltaic distributed generation to the industrial sector"; "Study of energy efficiency and possibility of self-consumption and sizing of the installation of a single-family house". (See first evidence in Contracts/ODS 7). 2. Educational resources to the community. For example, the University Training Programme in Municipalities (ForUM UJA): course 'Alternative energies: sustainability and energy efficiency' in the municipality of Andujar. (Second evidence). Evidence is public (web pages).</p>

Comment	<p>The University of Jaén promotes externally the public commitment to 100% renewable energy by participating in the second edition of the UJA-CEP Programme (Committed to Strategy of the province of Jaén). One of the activities carried out is the Conference 'Energy transition from the province of Jaén: threats and opportunities'. (First evidence. In this evidence you can see the link to this conference and programme in June. Another way of projecting this commitment is through the transfer of research to society. For example, the MATRAS research group (Modelling of the Atmosphere and Solar Radiation) is involved in the project called 'Development and analysis of a database of solar and wind resources of the Iberian Peninsula for the study of a low-carbon electricity system', which studies how to achieve maximum renewable energy production in the most efficient way. Comment	The University of Jaén through research collaborates with national policies (Agenda 30) on energy efficient technology and clean energy. LOCAL: Production of photovoltaic energy with the company ENDESA (See in 2 evidence in 7.2.3). REGIONAL: Promotion of Andalusian capacities for the bioeconomy in the olive grove, horticulture and algal biomass sector (Official body, Olive Institute (See second evidence in metric 7.4.3). NATIONAL: Ministry of Science and Innovation Programme: Study on solar and wind energy at national level to determine the spatial distribution and number of optimal solar plants and wind farms in order to obtain an electricity system based on renewable energies in the future (First evidence). GLOBAL: European project called 'Clean energy from road noise barrier infrastructure development'. Comment	<p>The remuneration of personnel is regulated by law or by sectorial collective agreements. They are established in the description of the job positions, included in the university budget and its liquidation, and subject to legal audit. Remuneration is higher than the minimum interprofessional wage established by the Government of the Nation (14000 euros per year full-time). It is also above the at-risk-of-poverty threshold of 20,024 euros for four-person households. The average direct salary of University of Jaén staff is 47,500 euros. (See first evidence of salary tables). It can be consulted in the Budget of the University of Jaén (Second evidence, page 295 and following). Evidence is public (web pages).</p>

Comment	<p>The University of Jaen in its StatBylaw establishes the policy in the Procedure for the preventive management of conflicts linked to situations of moral harassment at work: 1. It declares that harassment at work in any of its modalities is totally unacceptable nor tolerated. 2. All employees shall be guaranteed a working environment free of all types of harassment, whatever form it may take. 3. A working environment in which the dignity of the individual is respected (First evidence, page 3). This policy has been extended by the 3rd Master Plan for Equality and Integration of Sexual and Gender Diversity at the University of Jaén (2021-2023), which establishes the policies of equality and non-discrimination on grounds of gender at the university, including any form of sexism or direct or indirect discrimination on grounds of sex and the sensitivity and convictions of all people in the Community (second evidence, page 4). Comment	At the University of Jaén all employment activity is voluntary due to the legal and public nature of the employment relationship. By means of state, autonomic, own and labour regulations, the selection systems, working conditions and minimum age requirements (16 years old) are regulated (see in first evidence articles 105, 115 and 132). The University of Jaen is adhered to the 10 Principles of the United Nations Pact, which includes Principle 5: entities must support the eradication of child labour, as it is a form of exploitation that is a violation of human rights. Adherence was declared in 2009 and the letter of commitment from the CRector of the university has been renewed in 2021. (Evidence two, page 3). The evidence is public (web pages).

Comment	In the University's Equality Master Plans, the overall and average gender wage gap is analyzed. (See first evidence, page 9 and following of the document). The policy established in the 3rd Master Plan for Equality and Integration of Sexual and Gender Diversity at the University of Jaén (2021-2023) establishes actions to reduce the pay gap: 1. To achieve a balanced distribution of responsibilities and functions in all areas of university activity. 2. To increase and encourage research, training and awareness-raising in equality, sexual diversity and gender perspective in the university community. (See in first evidence, page 12). Comment	<p>The 3rd Master Plan for Equality and Integration of Sexual and Gender Diversity at the University of Jaén (2021-2023) includes a detailed study of the measurement of the gender wage gap between men and women by groups and in general. (See first evidence, page 8 and following). This Equality Plan sets out actions on which the impact of the equality policy is monitored on an annual basis. (See evidence one, page 29 and following). Example of monitoring of the 2nd Equality Plan in the second evidence. Evidence is public (web pages). However, it is indicated that Staff remuneration is regulated by law or by collective agreements. They are established in the job descriptions and are fixed according to the professional categories without there being any gender wage gaps in the performance of a post or category by legal imperative. Comment	<p>The University of Jaen as a public institution is subject to the legality of the selection processes that ensure the absence of discrimination and equal opportunities, based on the principles of merit and ability and the principles and procedures for the exercise of the right to access public employment (First evidence, Articles 55 to 62). The University of Jaen implements positive discrimination policies for people with disabilities through the reservation of positions as established in the Basic Statute for Public Employees (First evidence, Article 59). Example of the last call for applications at the University of Jaen with reservations for disabled persons (See point 1.1 in the second evidence). Regarding positive discrimination policies for women, as indicated in metric 5.6.1, they are incorporated in the III Master Plan for Equality and Integration of Sexual and Gender Diversity at the University of Jaen (2021-2023). Comment	The University of Jaen in its Policy Statement on Environmental Sustainability indicates: Promoting reduction and recovery (reuse, recycling and recovery) of waste generated by the activities of the university. (See Evidence one 12.2.3). Systematic measurement of waste generated, removed and recycled (toner, electrical/electronic devices, lamps, batteries, vegetables) is carried out (see example of clean points installed on the campuses of Jaén). The policies have been revised and reinforced with the Environmental Sustainability Master Plan of the University of Jaén 2021-2023 (In the second evidence, page 43, it can be checked the associated recycling indicators (Indicator 19: Reduction of the percentage of waste production. Comment	The University of Jaen in its Policy Statement on Environmental Sustainability has established: Promoting reduction and recovery (reuse, recycling and recovery) of waste generated by the activities of the university. (First evidence). In application of this policy, measures have been adopted to reduce plastic waste: 1. The installation of filtered water fountains has been completed. 2. Single-use bottles have been eliminated in meetings and academic events of the University of Jaén. 3. All UJA staff received a glass bottle for individual use. 4. Collaboration with external suppliers for the reduction of plastic cups. (First Evidence). The policies have been revised and reinforced with the Environmental Sustainability Master Plan of the University of Jaén 2021-2023 (Second evidence). Evidence is public (web pages).

Comment	<p>The University of Jaen in its Policy Statement on Environmental Sustainability indicates: Promoting reduction and recovery (reuse, recycling and recovery) of waste generated by the activities of the university. (See evidence 12.2.3, page 1). The policies have been reviewed and reinforced with the Environmental Sustainability Master Plan of the University of Jaén 2021-2023 with two related programmes: 1. waste minimisation plan that includes all types of waste. Increase segregation points for waste assimilable to urban waste (paper, packaging, organic and inorganic) and clean points. (see evidence two, page 25). An example of a policy promoting the recycling of disposable items is the campaign in the university community on paper (Second evidence). The evidence is public (website).</p>

Comment	In contracting outsourced services management, mandatory clauses of sustainability and environmental protection criteria are established, which extend the waste management policies. As an example, the 2018/02 contract file for the operation of the Residence Hall is indicated. Clause 9 provides the following. 1. The current regulations regarding spills and waste must be complied with. 2 It will be obliged to implement a waste separation and collection system in accordance with better environmental performance. 4. The obligation is established to separate the waste according to its recycling possibilities: glass, paper, cardboard, cans, organic remains of food and used household oils, which must go in their respective containers. 5. Single-use containers (soft drinks and water) should be replaced by returnable glass containers. 2018/02: (Evidence, page 24 and 25). Evidence is public (web pages).

Comment	In the contracting of works, services and supplies, mandatory clauses of sustainability and environmental protection criteria are established that extend the waste management policies. As an example, the 2020/02 file on the maintenance and conservation service of air conditioning systems and ACS production with sustainability and environmental protection criteria and supply of the necessary equipment is indicated. It is expressly stated: To promote prevention in the generation of waste, correct management of all waste generated in the activities and operations that are the subject of the contract, including waste electrical and electronic equipment (WEEE) as well as waste of containers and packaging (Evidence, page 25). Evidence is public (web pages).

Comment	<p>The University of Jaén has an "Andalucía Ecocampus" programme developed by the "Aula Verde" Unit. This programme includes activities related to Environmental Volunteering, Environmental Awareness Activities in the Natura 2000 Network. This programme of the course "Introduction to Environmental Education and Volunteering" is open to the community (in the first evidence, you can see the link to the programme, it includes a training workshop on energy efficiency and sustainable construction). A campaign has been carried out (academic year 2021-22) to present their collaborative work for the development of solutions to the challenge of climate change, within the framework of the European project MOST (II MOST at UJA). More than 1,000 schoolchildren of different ages from the province of Jaén have been involved in this programme (second evidence). The evidence is public (web pages). Evidences are public (web pages).</p>

Comment	<p>The University of Jaen develops projects for the improvement of energy efficiency and sustainability with community and collaborative impacts. The photovoltaic energy production project with an energy company for the installation of photovoltaic solar energy production plants on the Jaén and Linares campuses stands out. This project began in 2018 and has started its activity in 2020 and 2021, its aim is to reduce the emission into the atmosphere of 700 tonnes of CO2 per year equivalent to the planting of more than 71,000 trees (First evidence). In the framework of the Sustainable Mobility Master Plan, projects are developed in collaboration with the Jaén City Council, the province and the Andalusian Governments, for example, promotion of the use of bicycles, "Hack the city" programme (Second evidence). Evidences are public (web pages).</p>

Comment	<p>LOCAL AND REGIONAL. Meteorological Station of the University of Jaén is part of the Network of meteorological stations in Andalusia for monitoring climate change measurements (Evidence 1). The main way of collaboration is through research projects with external funding such as the one developed by the Andalusians Institute for Earth System Research (IISTA, University of Jaén, University of Granada, and University of Córdoba) (Second Evidence). Another line of collaboration is through the Center for Advanced Studies in Energy and Environment (CEAEMA), focused on the strategic area of renewable energies, energy and its relationship with the environment. Evidences are public (web pages).</p>

Comment	<p>The University of Jaén cooperates on climate risks through research activity. Local and regional example: Effects of climate change on adaptive functional traits and dispersal in herbaceous communities of the olive agrosystem (first evidence, can be seen in the ODS13 research project document). The University of Jaén coordinates the SUSTAINOLIVE project (ongoing), which aims to calculate the climate change mitigation potential of olive cultivation under different combinations of management practices in olive groves of different tree densities. Comment	<p>UJA maintains open educational programmes for training in environmental education in collaboration with NGOs: Example: Diploma of Specialisation in "Cooperation for Development with Sub-Saharan Africa" (2nd Edition). Collaborating NGO: Fundación Huerta de San Antonio de Úbeda. Objective: Development dynamics that currently exist in Sub-Saharan Africa within the framework of the guidelines of the 2030 Agenda, the master plans of Spanish and Andalusian Cooperation and the 3rd Africa Plan. The university implements international cooperation projects with an impact on climate action. Agroforestry actions to generate resilience to the effects of climate change in the eastern dry corridor of Guatemala. 2. Comment	<p>The University of Jaén assumes the objectives of the Ministry for Ecological Transition established in the National Integrated Energy and Climate Plan 2021-2030, which transfers the objectives of the European Union and the 2030 Agenda (Neutrality of emissions in 2050 and a second reduction objective in 2030 of 39.5%. An improvement in primary energy intensity of 3.5% per year until 2030 is considered. The University of Jaen has revalidated its commitment in the Master Plan for Environmental Sustainability of the University of Jaen. Reduce the environmental impact caused by the UJA's own activities, minimising the global carbon footprint in the operation of the university institution) (Evidenced by other metrics). The University of Jaen monitors greenhouse gas emissions due to final energy consumption (CO<sub>2</sub>, SO<sub>2</sub> and NO<sub>x</sub> per year due to energy consumption). It measures levels 1 and 2 of electricity and fuels (Evidence two). Las evidencias son públicas (páginas web).</p>

Comment	In compliance with the regulations for the prevention and management of legionellosis, all water supply systems in buildings have: 1. A mechanical filter in accordance with standard UNE-EN 13443-1. 2. A system of check valves, in accordance with standard UNE-EN 1717, to prevent the return of water due to loss of pressure or a reduction in the flow supply and, in particular, when necessary, to prevent mixing of water from different circuits, qualities or uses. 3. Periodic bacteriological analysis. Apply the biological decontamination process of the wastewater produced in building A1, Animal Experimentation and Production Center (Biowaste system). In the first evidence you can see the planning and Systems Maintained for the Prevention and Control of Legionellosis at UJA, (see evidence two of metric 6.3.2 for details of the development of the programme). Comment	<p>The University has a Master Plan for Environmental Sustainability 2021-2023 which establishes the objectives and action plans to reduce plastic waste (first evidence, see objectives and actions on page 25). Among the measures that have been implemented: 1. The installation of filtered water fountains has been completed. 2. Disposal of single-use bottles at University of Jaén meetings and academic events. 3. All UJA staff will receive a glass bottle for individual use. 4. Collaboration with external suppliers for the reduction of plastic cups. 5. Awareness campaigns are carried out: Course "Waste and recycling: management and environmental education" (Second evidence). The evidence is public (web page).</p>

Comment	The University of Jaén has a plan for the control of water consumption in their buildings and infrastructures (see first evidence and links to the control systems). Examples of actions: 1. Control of water discharged through the sanitation network. 2. Control of the production processes that research can generate with wastewater discharges, for which a continuous thermal effluent decontamination system (Biowaste) is applied. (Evidence 2. Installation Plan of Biowaste System in Building A1). 3. Planning and implementation of regulatory and incentive maintenance includes action plans and the scope of the different areas, ensuring the control and reduction of physical, chemical or biological alterations that may affect the discharge of water (see evidence in SDG 6). The evidence is public (website).

Comment	<p>The University of Jaén, supervises the internal ecosystems through the application of preventive and regulatory maintenance, for example: Programming for the prevention and control of Legionellosis (Evidence 14.4.1). Maintenance of the water installation: Connections and exterior and interior distributions. Accountants Cisterns and deposits. Pressure groups. Bilge pumps AFCH sources. Ornamental fountains. Sanitation Toilets and changing rooms. Laboratories (Evidence 1, the plans can be consulted in the link document). Externally, through research projects on water resources, for example: Mineral processes of fixation and solubility of contaminant metal nanoparticles in lake and river sediments. 2. 2. Behaviour of Metallic Nanoparticulate Compounds from Agricultural Activities in Wetlands of the Province of Jaén: Interaction of Geochemical and Microbiological Processes (See in evidence second SDG 14). Comment	The University of Jaén, through the Green Classroom, carries out a program in the annual Andalusia Ecocampus program in which "Environmental Awareness Activities in the Natura 2000 Network" are carried out. Among the activities carried out in the year 2021 we highlight the following events: 1. Conference Collado de los jardines y los órganos, natural monument of the Despeñaperros Natural Park (First evidence). Every year the University celebrates World Environment Day. In the year 2021 has dealt with the restoration of ecosystems means to prevent, stop and reverse this damage, to move from exploiting nature to heal it (United Nations Decade on Ecosystem Restoration (-2021-2030-). Comment	The University of Jaén is a member of the board of the Natural Park of the Sierras de Cazorla, Segura and Las Villas. It has approved a project to rehabilitate the Torre del Vinagre Forest House in the Cazorla, Segura and Las Villas Natural Park, assigned for use by the Junta de Andalucía. It will allow the University to have a headquarters for carrying out training and research activities related to sustainability and the environment (First evidence). Among the activities of the Green Classroom, Andalusia Ecocampus program, there is a line of action related to visiting Natural Spaces Natura 2000 Network and reforestations. A shared activity is carried out through scientific advice and updating of the World Heritage dossier "Olive Landscapes in Andalusia" (Second evidence. Document research contracts/ODS 15). Evidence is public (web page).

Comment	The water supply at the University of Jaén comes predominantly from the municipal network. In addition, in compliance with the regulations for the prevention and management of legionellosis, all water supply systems in the buildings have: 1. A mechanical filter in accordance with standard UNE-EN 13443-1. 2. A system of check valves, in accordance with standard UNE-EN 1717, to prevent water returns due to loss of pressure or reduction in the flow supplied and, in particular, when necessary to prevent mixing of water from different circuits, qualities or uses. 3. Periodic bacteriological analysis (Evidences 1 and 2). UJA applies the biological decontamination process for wastewater produced in Zone P2 of building A1, Animal Experimentation and Production Center (Biowaste system) (Evidence 2, Biowaste System Installation Plan in Building A1). Evidence is public (web page).

Comment	<p>The Bylaw of the University of Jaén has established the policy of collaboration between the university and society. See article 169, p. 139 (see in evidence about Bylaw presented in the metrics 16.2.2). This policy of interaction with stakeholders is included in the University's Mission Statement, which is set out and reviewed in successive Strategic Plans: "leadership in the socio-economic and cultural development of the province of Jaén". (First evidence, you can see the links to the strategic plans). Written procedures for interaction and relations are set out in institutional and quality management systems that establish procedures for stakeholder identification and relations. As an example, it can be checked the EFQM Report (European Foundation for Quality Management Model) of the Management System of the University of Jaén (page 19 and following, second evidence). Comment	The University of Jaén has established in its Bylaw (article 4) the principles of independence with respect to economic, social, political, ideological and religious powers and pluralism, respect for ideas and critical spirit. It promotes plural participation regarding social values. It offers a wide opportunity to discuss in an open and participatory manner with various political and social agents in the organization of conferences, congresses, seminars and forums. The 15th Summer Courses of the University of Jaén in Torres start with Human Rights in times of pandemic as the teaching central theme (First evidence). 2. The Aula de Debate promotes debates among students on current issues with external participation. (In the second evidence you can see links to the programme of activities for the academic year 2021-2022 and to the III Tournament in which schools from all over the province of Jaén participate). The evidences are public (web page).
