Comment	The University of Jaén is committed to the SDGs in its III Strategic Plan 2021–2029 (revision approved on 25 July 2025), which sets out to incorporate the SDGs into undergraduate and master's teaching, professional placements, lifelong learning and complementary training (OE1.2.6), and to contribute to the SDGs in students' holistic education through the principles of development education (OE8.1.1). It also aligns cooperation, volunteering and service-learning with the SDGs (OE8.1.4) and measures progress through indicators such as the number of SDG-related training activities. The Competence Catalogue requires all degrees to include the transversal competences CT1 and CT2, related to the SDGs. Comment	The University of Jaén measures students' knowledge through the assessment systems of each subject, set out in its course guides. For example, in "Water Resources and Aquatic Ecosystems" of the University Master's Degree in Analysis, Conservation and Restoration of Habitats (2024-25), assessment combines a written exam on the theoretical and practical concepts of the subject (80%) and practical projects, cases or exercises, with class attendance and participation (20%). To pass, a mark of at least 5 overall is required, and the weighted average only applies with at least 4.5 in both the theory exam and the practical work. Comment	The University of Jaén, through its Planning and Evaluation Service, monitors the average duration of studies of students receiving the State’s general scholarships, which are awarded according to family income thresholds. The indicator measures the years taken to graduate against the theoretical duration (4 years for Bachelor’s and 1 year for Master’s degrees) and is broken down by field of knowledge. For the 2024–2025 graduating cohort, the average duration was 4.81 years for Bachelor’s and 1.45 years for Master’s degrees (4.79 and 1.35 in 2023–2024). Source: Average duration of studies. Comment	The University of Jaén annually calls for Urgent One-off Social Aid to help ease the economic circumstances that prevent or hinder studying. The 2024/2025 call (resolution of 18 November 2024), with an initial budget of €130,000, is aimed at students who meet the income requirements of the Ministry's general scholarships (for example, €22,107 for a four-member family) but did not obtain the scholarship because of insufficient academic performance due to a duly proven exceptional circumstance. Aid ranges from €400 to €1,200 depending on enrolled credits and the need to live away from the family home, with tuition aid in exceptional first-year cases, and is prioritised by need and per capita income. Comment	Every year the University of Jaén calls for Urgent One-off Social Aid, the most direct programme to ensure that students with economic needs do not drop out or struggle to finish their studies. The 2024/2025 call (resolution of 18 November 2024, initial €130,000) is aimed at students who meet the income requirements of the Ministry's general scholarships but did not obtain the scholarship because of insufficient academic performance due to an exceptional circumstance. It provides aid of €400 to €1,200, aid for students who must live away from the family home, tuition aid in exceptional first-year cases and aid for non-EU students in vulnerable situations. It is complemented by grants to certify the language competence required for the Bachelor's degree. Source: Call for Urgent Social Aid 2024/2025, sections 1, 2, 4 and 6.

Comment	The University of Jaén has support programmes for international students from economically disadvantaged countries, such as the Aid Programme for refugee students, run since 2016 and presented to the UN as a good practice, and the programme for postgraduate students from Ibero-American countries. It monitors international students from low- and lower-middle-income countries according to the World Bank classification: 433 students in 2024–2025 (3.07% of enrolment). Among those who received aid that year: 35 from the Incoming Mobility Programme (lower-middle-income countries), 22 from the Undergraduate Talent Programme (low- and lower-middle-income countries), 3 from the Women for Africa Programme and 4 refugees or asylum seekers. Comment	The University of Jaén takes part in poverty-reduction programmes and policies at four levels. Local: the Urgent One-off Social Aid Plan for students who did not obtain the Ministry scholarship because of an exceptional circumstance (125 students in 2024–25). Regional: collaboration in managing the complementary aid programme of the Regional Government of Andalusia. National: collaboration in managing the Ministry of Education's general scholarship and study grant system, which ensures equal access by removing socio-economic obstacles. Global: support programmes for students from economically disadvantaged countries, such as the aid programme for refugee students, run since 2016 and presented at the UN as a good practice. Comment	Through special administrative contracts, the University sets conditions to offer healthy food at affordable prices in its dining halls and cafeterias. The specifications for the dining hall and cafeteria at the Linares Science and Technology Campus (file 2024/15) set maximum prices approved by the Management Office (menu of the day with starter, main course, bread, drink and dessert, €6.50; half menu, €4.75; coffee, €1.25), which cannot rise in the first year and afterwards only up to inflation with express authorisation. They require the healthy-food minimums of the CRUE Healthy Universities group and value options for allergies and intolerances, vegetarian dishes and local products. Comment	The University of Jaén intervenes in students' economic difficulties through Urgent One-off Social Aid, which aims to ease the economic circumstances that prevent or hinder studying. The 2024/2025 call, with an initial €130,000, grants aid of €400 to €1,200 depending on enrolled credits and the need to live away from the family home, with tuition aid in exceptional first-year cases and aid for non-EU students in vulnerable situations or social exclusion. Aid is prioritised by need and per capita income, and exceptional situations (death of a main earner, dismissal, serious illness, among others) take precedence. Comment	The technical report on the contract for the dining hall and cafeteria at the Linares Science and Technology Campus (file 2024/15) assesses a sustainable food offer: healthy menus based on the Mediterranean diet and extra virgin olive oil, with vegetables, greens or legumes daily and fresh fruit for dessert; menus for vegetarians and vegans and for food intolerances; seasonal and zero-kilometre products, with suppliers from Linares and surroundings; and products from organic farming and livestock. The contract's technical assessment sets these criteria for running the service. Source: Technical report, file 2024/15, pp. 3–4.

Comment	The University offers healthy and affordable food options in its dining hall and cafeteria through special administrative contracts. The specifications for the Linares Science and Technology Campus (file 2024/15) set maximum prices that cannot be exceeded (menu of the day with starter, main course, bread, drink and dessert, €6.50; half menu, €4.75; coffee, €1.25; half toast, €1.00; water, €0.80), with increases only up to inflation and with express authorisation. They require the healthy-food minimums of the CRUE and the Spanish Network of Healthy Universities: allergens listed, extra virgin olive oil, lactose-free milk and plant-based drink, and no promotions of pastries or sugary drinks. Comment	In general terms, the staff of the University of Jaén does not need interventions from food and supply banks. In those exceptional situations in which they may be in need, the Social Action Plan would be applied, which includes interest-free advances on income (See evidence, article 29, page 8).

Comment	On 16 October 2025, the University of Jaén, through its Applied Agroecology Group and within the international LIFE Oliver project, held the event “Carbon Credits: An Excuse to Design the Olive Grove of the Future” at the Aula Magna of the Las Lagunillas Campus, in collaboration with IFAPA and ASAJA Jaén. Attendance was free with prior registration, and it was aimed at the Andalusian olive oil sector, especially agricultural technicians, cooperatives, olive mills and farmers. It offered practical information, discussion and tools on carbon credit certification in olive groves as an alternative source of income, and a space to make contacts, create synergies and strengthen networks. Comment	The University of Jaén coordinates the Andalusian Living Lab-LivingSoiLL, which makes technology available to farmers to improve sustainable farming practices in olive groves. In 2025 it presented, at the International Olive Oil and Related Industries Fair, the “Suelo Vivo” app, the Living Lab’s digital platform designed as a hub of technological tools supporting farmers’ decisions to improve soil health. The app allows soil self-diagnosis and offers an interactive map of the Living Lab’s experimental farms, where olive farms in Andalusia with soil problems can be added, to give visibility to ongoing solutions and seek their replicability. Comment	The University of Jaén prioritises the procurement of local and sustainable products in university catering: in awarding the contract for the dining hall and cafeteria at the Linares Science and Technology Campus (file 2024/15), the quality and origin of products and raw materials score up to 20 points. The winning bid received an excellent rating because all its suppliers are from Linares or nearby cities, with zero-kilometre products, which supports the local economy and reduces transport impact, and it includes products from organic farming and livestock. Comment	The University of Jaén applies a legionellosis prevention and control programme under Royal Decree 865/2003 to prevent its water systems from becoming contaminated and posing a health risk: it maintains 10 domestic hot water systems, 18 cold water systems for human consumption, 3 sprinkler irrigation systems, 20 fire-fighting water systems, 4 ornamental fountains and 2 cooling towers, with periodic inspections, cleaning and disinfection, temperature and chlorine checks and more than 200 control analyses a year. In addition, building A1 (Animal Experimentation Centre), a critical facility, has a thermal effluent decontamination system (Biowaste) that prevents contaminated discharges into the sewage network. Comment	The University of Jaén incorporates water saving into the procurement of technical construction and engineering services (project drafting and works supervision in Jaén and Linares). The tender specifications for framework agreement 2024/23 require bidders to submit environmental sustainability measures, including water-saving and water-recycling systems (clause 17.3), and award up to 25 points for environmental improvements, including those that reduce water consumption, both during works and in the operation of buildings (clause 18.1.b). The conditions offered are essential in the derived contracts and non-compliance may lead to penalties. Comment	The University of Jaén applies water-saving landscaping within its project to improve the management of its green infrastructure, started in 2018: it chooses species with low water consumption, low maintenance and low exposure to pests, including the selection of native species (Objective 9), and optimises irrigation systems and reuses rainwater (Objective 5): the gardens of the Linares Campus, the University Accommodation building and the Jaén sports centre are irrigated with recovered rainwater, and ground cover and the return of organic waste help retain water in the soil. Comment	The University of Jaén uses water extraction technologies that allow sustainable management: ON CAMPUS. The rainwater collected on the Linares Campus is stored in a 1,000,000-litre cistern, which is used to irrigate gardens and fill toilet cisterns. The rainwater collected on the football field of the Jaén Campus is poured into a 150,000-litre cistern for watering gardens. OUTSIDE THE CAMPUS: The University of Jaén is a member of the Jaén Norte Residual Water Irrigation Cooperative, which allows the irrigation of gardens with properly treated wastewater. REGIONAL: through the Andalucía Ecocampus programme of the Regional Ministry of the Environment of the Junta de Andalucía, Aula Verde promotes the responsible use of natural resources, including water. NATIONAL: competitive national-scope project on wetlands and water resources (resolution 09/12/2025). GLOBAL: UJA coordinates REFFECT AFRICA (Horizon 2020), which develops renewable energy from agri-food waste in Morocco, Ghana and South Africa, with the possibility of supplying drinking water (until 2026). Comment	The University of Jaén promotes conscious water use through Aula Verde (Vice-Rectorate for a Sustainable and Healthy University), which in the 2024/2025 academic year organised 94 sustainability activities with 3,625 participants. These include the 16th Green Week (17–23 March 2025), held on the Jaén and Linares campuses around World Water Day (22 March), which featured the Hidrogeodía through the Sierra Sur de Jaén; a visit to the wetlands of western Almería (31 January); the premiere of the documentary “Islas de Vida” on Jaén’s wetlands; and a volunteer day to clean and assess the Jaén river. In addition, UJA monitors water consumption every year (126,090 m³ in 2025, 2.47% less than in 2024). Source: Aula Verde, Activity Report 2024–2025.

Comment	The University of Jaén promotes conscious water use among the public through activities open to the whole of society. On 26 April 2025 the UJA Department of Geology, with the collaboration of Aula Verde and coordinated by the Spanish Group of the International Association of Hydrogeologists, organised Hidrogeodía Jaén 2025, a nationwide hydrogeology outreach day held to mark World Water Day. It was a guided itinerary, entirely free and open to people of all ages with no prior knowledge, with free bus transport and a free snack, through springs, aquifers and the Susana river area (from Los Villares to Valdepeñas de Jaén), with explanations on the origin and behaviour of groundwater. Comment	The University of Jaén has a process to manage carbon and reduce its CO_2 emissions: every year the Technical Unit calculates and publishes indicators of primary and final energy consumption and of greenhouse gas emissions (scopes 1 and 2: electricity and fuels), applying IDAE emission factors, within the framework of the Environmental Sustainability Master Plan (aim: to minimise the carbon footprint) and the objectives of the National Integrated Energy and Climate Plan 2021–2030. In 2025 emissions were 2,757 t CO_2 eq, 33.2% less than in 2024, with final energy consumption of 9.36 GWh (−30.8%). Source: Technical Unit, UT Environmental Indicators (2025 exercise).

Comment	The University of Jaén implements its Energy Saving and Efficiency Master Plan 2022–2024, extended until 2025 (approved by the Governing Council on 24/11/2022), which sets out its energy policy in three objectives and 23 actions: reducing consumption in the short term (e.g., air-conditioning limited to 19–21 °C in winter and 26–27 °C in summer), engaging the university community and the caretaking, security and cleaning teams, and improving efficiency in the medium and long term (lighting, building envelope and air-conditioning). It sets targets, such as cutting electricity consumption per person by 10% in 2024 compared with 2021 and reaching 25% renewable energy in 2025, and a committee that oversees it every two months. In 2025 final energy consumption fell by 30.8% compared with 2024. Source: Energy Saving and Efficiency Master Plan (extended until 2025), pp. 5–20.

Comment	The University of Jaén reviews energy use in its buildings through its regulatory (technical-legal) maintenance programme run by the Technical Unit, which includes ten-yearly energy audits of buildings and regulatory maintenance of thermal installations (RD 1027/2007). The results are compiled in a general list of energy ratings for buildings on the Jaén and Linares campuses and other properties, with their consumption (kWh/m²·year) and emissions ($kgCO_2/m^2$·year) per floor area, which makes it possible to identify those with the highest consumption. In addition, it has network analysers in all buildings to monitor electricity consumption and, in the Energy Saving and Efficiency Master Plan (AYE3.A2), plans studies to identify the spaces and laboratories that use the most energy. Comment	The University of Jaén includes in its policy in the Environmental Sustainability Policy Declaration of the University of Jaén: Establish a management system to prevent, reduce and eliminate the environmental impact derived from its university activity. Promote the saving of natural resources, raw materials and energy, rationalizing consumption. This policy has been reviewed in the Environmental Sustainability Master Plan of the University of Jaén 2021-2023, extended until 2025 (see evidence, page 4: Reduce the environmental impact caused by the UJA's own activities, minimizing the global carbon footprint). In application of this policy, the consumption of electrical energy from polluting sources is reduced through the production of clean energy in new buildings (Biomass, solar thermal and solar photovoltaic). Comment	The University of Jaén promotes renewable energy beyond the university through the Ibero-American RIBIERSE-CYTED Network for the large-scale integration of renewable energy into electricity systems, whose coordinator is a UJA professor and whose aim is to promote the decarbonisation of the electricity sector by integrating renewable sources and combining them with storage and e-mobility. In November 2025 UJA took part in the 3rd Annual Meeting of the Network at the Universidad Distrital Francisco José de Caldas (Bogotá, Colombia), with round tables on planning and management of large-scale renewables, technological, regulatory and socio-economic barriers, and training of researchers, managers and end users. Comment	The University of Jaén joined the ten principles of the UN Global Compact on 23/09/2009 and reaffirms its commitment in the rector's letter opening its 2025 Commitment Report (pp. 3–4). Among the labour principles it has adopted are supporting "the elimination of all forms of forced and compulsory labour" and "the effective abolition of child labour" (p. 31). In supplier management it maintains an ethical commitment to those principles: it applies the contracting prohibitions of Law 9/2017, controls human-rights risks, including those associated with the employment relationship, and aims not to award contracts to suppliers that breach domestic and international law (pp. 51–53 and 73). Comment	The University of Jaén has an institutional pay equity policy, updated in 2025 through the approval of the 4th Gender Equality Plan of the University of Jaén (2025–2029) by the Governing Council in July 2025. The Plan's diagnosis analyses pay differences between teaching and research staff (PDI) and technical, management and administrative staff (PTGAS) (pp. 11–13). It also includes Action 4: "Assessment and monitoring of the gender pay gap and, where appropriate, the establishment of measures to correct or reduce it", with an indicator requiring annual monitoring reports on salaries and salary supplements (p. 38). Comment	The University of Jaén recognises the rights of freedom of association and collective bargaining of its staff within the framework of national legislation and its Statutes. These establish that teaching and research staff contracts are governed by labour legislation and collective bargaining (Art. 93.2, p. 95) and provide for staff representation and the participation of staff representatives in determining working conditions, including financial, employment-related and professional conditions, through representative bodies and trade unions authorised to negotiate (Arts. 96, p. 96, and 130, p. 119). They also include justice, equality and pluralism among their values (Art. 2, pp. 35–36). Source: Statutes of the University of Jaén (Decree 235/2011), Arts. 2, 93, 96 and 130.

Comment	The University of Jaén admits its undergraduate students under the admission procedure of the Andalusian Single University District for 2024-2025 (Agreement of 05/03/2024, BOJA no. 56, 20/03/2024), which includes UJA (Art. 3, pp. 3-4). As a positive-action measure it reserves places (Art. 12, p. 18): 5% for students with disabilities, 3% for high-level or high-performance athletes (8% in Physiotherapy and in Physical Activity and Sports Sciences), 2% for applicants over 25, 2% for applicants over 40 with experience and over 45, 1% for graduates and an additional 1% for people at risk of social exclusion. It regulates the accreditation of these situations (Art. 5, p. 9). In addition, the UJA Diversity Plan includes the action to guarantee equal treatment and equal opportunities in joining university life. Comment	The University of Jaén measures and monitors the access of an underrepresented group, students with disabilities, through its institutional information system (SIIUJA), with data published in its Statistical Yearbook. The evidence shows the evolution of the number of students with disabilities enrolled in undergraduate programmes, disaggregated by sex, from 2021-22 to 2025-26. In the 2024-25 academic year, 106 students with disabilities were enrolled (63 men and 43 women), compared with 108 in 2023-24 and 98 in 2022-23. Comment	The University of Jaén, through its Specific Educational Support Needs (SESN/NEAE) Service, offers advice and individualised support to students with disabilities. Students email diversidad@ujaen.es, briefly describe their difficulty and request an appointment, preferably in person. In the interview, their academic difficulties are identified and the reasonable adjustments they need are offered. These are recorded in an NEAE Report, an official document endorsed by the University’s governing body and the relevant Faculty or School, which is sent to all teaching staff responsible for the student; the student then requests a tutorial with each lecturer to explain the adjustments. Comment	The University of Jaén has a Sustainable Mobility Master Plan (in force since 2021 and extended until 2025), whose objectives are to optimise accessibility to the University and promote sustainable mobility (p. 7). It includes measures to encourage walking and cycling, facilitate public transport, provide parking for electric vehicles, promote a car-sharing platform and raise awareness in the university community (pp. 18-20). It defines monitoring indicators and quantified targets, such as 100 parking spaces for sustainable individual mobility vehicles (p. 25) and a 10% reduction in the use of private motorised vehicles compared with 2021 (p. 27), with annual monitoring (p. 31). Comment	The University of Jaén promotes sustainable mobility through the electric bicycle programmes “Tu bici en la UJA” and “Hack the City”, which facilitate daily journeys of the university community to and from the campuses. “Tu bici en la UJA” has 17 bicycles (12 on the Jaén Campus and 5 on the Linares Campus) and “Hack the City” has another 20, including seven raffled among international students. In the first four-month period, participants travelled 6,000 km. “Hack the City” is driven by the UJA, Jaén City Council, the Regional Government of Andalusia (Transport Consortium) and the Provincial Council. In addition, the UJA carries out other actions under its Sustainable Mobility Master Plan, such as car sharing, Ecominuto and awareness-raising. Source: UJA Digital Newspaper (27/02/2025).

Comment	The University of Jaén's Sustainable Mobility Master Plan (in force since 2021 and extended until 2025) prioritises pedestrian mobility on the campuses: it provides for reviewing, improving and increasing pedestrian routes (p. 13) and their urban layout (p. 21), and sets indicators and targets such as the percentage of entrance gates allowing pedestrian access and the number of signposted routes (p. 24). It also includes the CRUE and GreenMetric indicators on actions and pedestrian route policy to pedestrianise the campus (pp. 8-9). In addition, the Jaén Campus has an external ring road for cars and the rest is pedestrian; the Linares Campus has an access car park and the rest is pedestrian; and 36% of the surface area is unbuilt. Comment	The University of Jaén collaborates with Jaén City Council on planning and urban development. On 3 October 2025, the Rector and the Mayor reviewed the steps for the City Council to transfer to the UJA the SUNP-5 land (130,000 m², under the agreement signed in 2000) to expand the Las Lagunillas Campus, and both institutions are working together on the expropriation project. Part of the land would be used for research and innovation, and social and public housing is also envisaged. In addition, the City Council approved the change of legal status by which the land for the future student residence in Plaza de Santiago passes to the University, which will request an increase in building floor area from 3,000 to 4,500 m² to provide more accommodation. Comment	The University of Jaén has a Technical Instruction on Waste Minimisation 2025-2029, approved by the Vice-Rectorate for Sustainable and Healthy University on 10/09/2025, which sets annual monitoring and quantification in kilograms of different waste streams: hazardous waste (2004-2024 series, pp. 11-12); WEEE, lamps, batteries and printer cartridges (2014-2024, pp. 14-17); and pruning waste, bulky waste and confidential paper (2021-2024, pp. 18-19). It identifies the recycling and treatment operators for each stream (RECILEC, AMBILAMP, ECOPILAS, GICAM and RESURJA), provides seven recycling points (p. 39) and sets indicators with annual evaluation (pp. 30-34). For municipal waste, it provides for requiring waste measurement in cleaning and catering contracts (pp. 28, 32). The Instruction provides for maintaining the policy of reducing packaging by avoiding the provision of bottled water (p. 27), promoting agreements with suppliers to minimise packaging and plastic (p. 26), incorporating packaging reduction into procurement specifications (p. 27) and running campaigns to reduce plastic use, especially single-use packaging (p. 28). This policy has been applied since 2020: single-use bottles were eliminated at meetings and academic events (using glass jugs and glasses), filtered water fountains were installed and a glass bottle was given to all staff. Comment	The University of Jaén extends its waste prevention policies to outsourced services through its tender specifications. For example, the Technical Specifications for the contract to operate the dining hall and cafeteria at the Linares Scientific and Technological Campus (contract 2024/15) state that the minimum possible amount of packaging must be used, bread must be offered unwrapped, potable tap water must be available, and reusable tableware must be used. For takeaway orders, only disposable containers made of plastic or recycled cardboard are allowed, and their minimal environmental impact on disposal is valued. These requirements are therefore passed on to the external company providing the service. For example, the Technical Specifications for contract 2020/02 (a mixed contract for the maintenance and upkeep of air-conditioning and domestic hot water systems, and the supply of the necessary equipment) include a section on sustainability and environmental protection criteria. It requires the contractor to promote waste prevention, to properly manage all waste generated, including waste electrical and electronic equipment (WEEE) and packaging waste, and to ensure environmental training for its staff. Comment	The University of Jaén measures annually the energy it consumes and the energy generated from renewable sources at the Las Lagunillas and Científico-Tecnológico de Linares campuses, based on distributors' invoices. In 2025 it records photovoltaic production of 166,938 kWh and a total of 267,388 kWh of renewable energy. It also measures final energy consumption (9,359,190 kWh) and primary energy consumption (19,846,670 kWh) by source: electricity, natural gas, heating oil and densified biomass. It also calculates annual greenhouse gas emissions (2,757 t CO_2 eq) and their year-on-year change. Source: Environmental Indicators UT 2025, Works, Maintenance and Facilities Surveillance Service	
Total energy used	33.693GJ	-31%
Warning explanation	The reduction in total energy consumption is attributable to the energy efficiency and sustainability measures implemented at the University of Jaén (UJA), particularly the optimisation of air-conditioning system schedules and settings, the continuous improvement of building envelopes and equipment, and the rationalisation of building operating hours.	
Total energy used from low-carbon sources	16.660GJ	-35%

Comment	The University of Jaén, through Aula Verde and the Sustainability Secretariat, runs environmental and climate education programmes for the university community and society at large. In the 2024-2025 academic year it organised 94 activities with 3,625 participants. These included, on climate change: a talk by Isabel Moreno, presenter of the TV weather programme “El Tiempo”, during Sustainability Week (19-28 September 2024) and, during the 16th Green Week (17-23 March 2025), the presentation of the 1st International Congress on Sustainability and Climate Change (CONCLIMA). Green Week also featured the Hidrogeodía in the Sierra Sur of Jaén and ODSERVA virtual reality stands on both campuses. The University Diploma in SDGs offered 20 courses and the Eco-garden held six training workshops. Source: Aula Verde Activity Report 2024-2025, sections 1-3.

Comment	The University of Jaén has an Environmental Sustainability Plan (a Master Plan in force since 2021 and extended), whose objectives include taking urgent action to combat climate change and its effects (p. 7) and programmes on climate change risks, impacts, mitigation, adaptation, impact reduction and early warning (p. 9). It provides for calculating the University’s carbon footprint (p. 25), preparing an annual greenhouse gas emissions report and establishing an emissions reduction programme (pp. 32 and 42). It includes collaboration with city councils and other administrations and participation in local, provincial and regional bodies (pp. 23-24), and its monitoring indicators are public (p. 17). Comment	The University of Jaén leads, within the LifeWatch-INDALO project ("Scientific infrastructures for monitoring and adapting to global change in Andalusia"), the creation of six stations in the Sierra Sur of Jaén and the Sierra de Segura that monitor climate change processes in the forests of the Andalusian Subbetic ranges, within the Global Change Observatory of the Sierras Subbéticas. The project is coordinated by the Andalusian Environment and Water Agency (AMAYA) of the Regional Government of Andalusia, with all Andalusian public universities, INTA, IFAPA and CICA taking part, and is funded by ERDF. In addition, the UJA takes part with its Meteorological Station in the Network of Meteorological Stations of Andalusia for climate change monitoring.

Comment	The University of Jaén collaborates with environmental associations on education and conservation of the natural environment. On 11 October 2025, Aula Verde organised the Environmental Volunteering event “II Río Frío Environmental Assessment and Clean-up”, coordinated by CE2A El Acebuche and in collaboration with the ZAITUN Environmental Education Association. The free event, aimed at the university community (25 places), included an environmental assessment of the river, a clean-up of its surroundings and awareness-raising actions on its conservation and respect, in an area of great environmental value. Commitment to carbon neutral university

Does your university as a body have a target date by which it will become carbon neutral according to the Greenhouse Gas Protocols?	scope 1, scope 1 and 2	-
Evidence	Evidence url: https://www.ujaen.es/servicios/utecnica/eficiencia-energetica-y-ods/indicadores-medioambientales-ut (https://www.ujaen.es/servicios/utecnica/eficiencia-energetica-y-ods/indicadores-medioambientales-ut)	
Comment	The University of Jaén declares its commitment to the objectives set out in the 2021-2030 National Integrated Energy and Climate Plan: emissions neutrality by 2050 and a 39.5% reduction by 2030. It has reaffirmed this commitment in its Environmental Sustainability Master Plan 2021-2023, whose General Objective 2 is to reduce the environmental impact of its activities by minimising its overall carbon footprint. The UJA publishes annual energy consumption and emissions indicators: in 2025, CO_2 emissions associated with energy consumption amounted to 2,757 t CO_2 equivalent. It measures emissions from electricity and fuels (Scopes 1 and 2). Source: Environmental Indicators UT, Works, Maintenance and Facilities Surveillance Service, University of Jaén.	
Achieve by	2030	0%
Comment	The targets for Levels 1 and 2 are expected to be achieved by 2030, based on the photovoltaic energy production plan, which aims to reduce emissions by 700 tonnes of CO_2, the Sustainable Mobility Plan, and the UJA Green Infrastructure Ecosystem Services Plan. Greenhouse gas emissions from final energy consumption (2020–2025 period). Annual CO_2 emissions per square metre of built area (t CO_2 eq/m²): 2025 value: 0.0118; period average: 0.0183; year-on-year change in 2025: −33.33%; annual CO_2 emissions (t CO_2 eq) in 2025: 2,757.

Comment	The University of Jaén organises Hidrogeodía, a hydrogeology outreach event linked to World Water Day, promoted by the Spanish Group of the International Association of Hydrogeologists (AIH-GE) and held across Spain. On 26 April 2025, the Department of Geology, in collaboration with Aula Verde of the Vice-Rectorate for a Sustainable and Healthy University, offered Hidrogeodía Jaén 2025, “Hydrogeological route through the Sierra Sur de Jaén”: a guided visit, free of charge and open to the general public, with no prior knowledge or age limit (50 places, with a bus provided by the organisers). It visits the springs between Los Villares and Valdepeñas de Jaén (source of the Río Frío, Susana River and Las Chorreras) and explains why some springs flow only in rainy periods while others keep a stable flow. Comment	The University of Jaén does not currently have a specific policy to ensure that food on campus that comes from aquatic ecosystems is obtained sustainably. However, through research and development, the UJA tries to find innovative solutions that improve the sustainability of aquatic food production. In addition, the UJA promotes education and awareness about the importance of sustainability in fisheries and aquaculture, both among consumers and producers. An example are the R&D&I solutions offered to Industries: 1. The research group "Ecology and Biodiversity of Aquatic Systems" (RNM-300) focuses its research on the study of aquatic ecosystems, both marine and continental, of natural and artificial origin (see evidence).

Comment	R&D solutions offered to industries: The University of Jaén’s “Ecology and Biodiversity of Aquatic Systems” research group offers an ecotoxicological assessment service for new materials through its R&D&I Solutions Catalogue. Ecotoxicology is routinely used in environmental toxicological risk assessment of new substances or materials, and the group has experience using standardised protocols involving aquatic organisms to assess the risks associated with substances, new materials and their elutriates. The service is aimed at companies and organisations in various productive sectors, including energy, environment and water, and materials and construction. Comment	In its Technical Instruction on Waste Minimisation 2025-2029, approved by the Vice-Rectorate for Sustainable and Healthy University on 10/09/2025 (p. 1), the University of Jaén sets out measures to prevent water pollution from waste generated by its activities, especially hazardous laboratory waste: never dispose of waste down the drain (p. 49), do not mix or dilute it (p. 44), package and label it, and store it with systems to contain leaks and spills (p. 45). It includes a contingency plan for spills of chemical substances or biological liquids (pp. 52-53). It states that preventing this pollution protects water sources and improves the quality of sanitation (p. 3). Comment	The University of Jaén carries out control and prevention measures to reduce the risk of water pollution from its activities. Its official Water Consumption webpage describes the control of water discharged through the sewerage network: only research can generate wastewater discharges subject to some degree of control, Building A1 (Animal Experimentation Centre) is identified as a critical facility because of its potential impact and has a continuous thermal effluent decontamination system (Biowaste), and periodic analyses of sanitary water are scheduled. In addition, the Technical Instruction on Waste Minimisation 2025-2029 (approved on 10/09/2025) prohibits disposing of waste down drains and provides for spill response. Comment	The University of Jaén's research group "Ecology and Biodiversity of Aquatic Systems" (RNM-300) offers, through the R&D&I Solutions Catalogue, an aquatic ecosystem restoration service that aims to recover degraded ecosystems, contribute to their conservation and restore their ecosystem services. According to its description, restoration activities require a holistic approach that considers both human impacts on the drainage basin and changes in surface water and groundwater flows. The service is aimed at companies and organisations in various sectors, including energy, environment and water, and agri-food. Comment	During the 2024–2025 academic year, the University of Jaén, through its Aula Verde environmental programme, organised awareness, training and volunteering activities to promote land conservation and sustainable use. These included seven interpretive routes through natural areas (Valdearazo River Valley, Sierra Mágina, Cerrada de Utrero and Despeñaperros, among others), the recognition of remarkable trees (European Tree Tag 2024), the 16th Green Week (17–23 March 2025), including Hydrogeology Day in the Sierra Sur, and the University Eco-Garden, an organic farming project open to the public, with six workshops and volunteering (see evidence: remarkable trees, p. 5; 16th Green Week, pp. 5–6; interpretive routes, p. 7; University Eco-Garden, pp. 10–11).

Comment	The University of Jaén applies sustainable food criteria when contracting its campus cafeterias and canteens, in line with its Third Strategic Plan (PEUJA 2021–2029, revised in 2025; Strategic Objectives 8.3.4 and 8.4.1) and the Healthy University Master Plan. In the contract for the canteen-cafeteria at the Linares Scientific and Technological Campus (file 2024/15), product quality and origin account for up to 20 points. The technical evaluation report (30/09/2024) scores the winning bid for including organic farming and livestock products and zero-kilometre products from local suppliers, which support the local economy and reduce transport pollution, as well as seasonal Mediterranean-diet menus with extra virgin olive oil (pp. 1, 3–4).

Comment	In 2025, the University of Jaén worked directly to maintain and extend ecosystems and their biodiversity. On campus, gardens cover 36% of the area, with €50,000 invested in 2025 to expand them; the Urban Tree Management Plan has inventoried 1,146 trees, and refuge areas for beneficial wildlife, a native species garden and the 25th Anniversary Forest are maintained (pp. 5–6). Off campus, Aula Verde environmental volunteers improved amphibian habitat in Despeñaperros Natural Park and, in threatened ecosystems, the UJA coordinates SOIL O-LIVE, which in 2025 trained over 900 farmers in olive grove soil health and biodiversity, and leads LIFE Olivares Vivos+ (p. 6).	
Does your university as a body offer educational programmes on ecosystems (looking at wild flora and fauna) for local or national communities?	free	-

Comment	The University of Jaén, through its Aula Verde programme, organises educational and environmental interpretation activities on natural heritage and ecosystem conservation. For the 16th Green Week, on 23 March 2025 it organised the free, open activity "Visit to Despeñaperros Natural Park: Empedraillo, Natural and Ethnographic Heritage", with 50 places and departure from Jaén. This guided tour aimed to explore geological formations, recognise the importance of the Hornillo stream for wildlife, learn about the traditional forestry use of plant resources such as cork, rockrose resin (ládano) and pine resin, and appreciate the area's natural resources for their contribution to the sustainable socio-economic development of the local population. The activity included guides, bus transport and insurance.

Comment	The University of Jaén, through Aula Verde, has run the Ecohuerto UJA programme since 2016 on a previously degraded area of the campus. In October 2025 it launched, free of charge (€0.00), the course "Ecohuerto Universitario 1. Environmental Volunteering" (75 places), to learn organic farming and bioconstruction techniques and how to create and maintain an organic garden. In 2025 it held workshops on soil fertility (4 October), biodiversity (8 November) and healthy eating (13 December), together with practical sessions in the garden. The course is open to society as a whole: in addition to the university community, it admits graduates, staff of schools wishing to create a garden, and any interested person until places are filled.

Comment	The University of Jaén, through Aula Verde and in collaboration with the Zaitun Environmental Education Association, organised the 4th Photographic Exhibition "Ecotourism in the Natural Areas of Jaén", open to the public from 14 to 28 January 2025 in the B4 lecture building on the Las Lagunillas campus, with awards for the selected photographs. It aimed to raise awareness of the province's natural areas, highlight their natural heritage and promote sustainable tourism that contributes to biodiversity conservation. The photographs showed sites visited with the Zaitun Association in the Sierra Sur and in the Sierra Mágina, Despeñaperros and Sierras de Cazorla, Segura y Las Villas Natural Parks.	

Supporting land ecosystems through action

Comment	The University of Jaén's policy for the conservation, restoration and sustainable use of the terrestrial ecosystems associated with the university is set out in its Environmental Sustainability Master Plan 2021–2023, extended until 2025, which implements the Third Strategic Plan (PEUJA, revised in 2025) and is aligned with SDG 15 to halt biodiversity loss (pp. 5–8). It incorporates sustainability criteria into green space management and campus urban design to improve biodiversity (SAO1.L1.A4, p. 29) and, through the UJA Green Infrastructure Improvement Project, strengthens its networks, enhances ecosystem services and increases plant and animal biodiversity (SAO2.L4.A1, p. 35)

Comment	Since 2018, the University of Jaén has run a project to improve the management of its green infrastructure, which includes the Urban Tree Management Plan and is part of its Environmental Sustainability Master Plan and Third Strategic Plan (PEUJA, revised in 2025). Aligned with the EU Biodiversity Strategy for 2030, it sets objectives to identify, monitor and protect species on its campuses: cataloguing of trees, shrubs and herbaceous vegetation (objectives 2 and 3), biological pest control (7), refuge areas for beneficial fauna and natural predators (8), selecting plant species suited to natural conditions (9), maintaining tree canopies for nesting by beneficial macrofauna (11) and enhancing biodiversity (12). It has also eliminated pesticides and herbicides and rewilded grasslands.

Comment	The University of Jaén takes biodiversity conservation into account in the urban development of its campuses. As a result, landscaped areas have increased by 10 percentage points to 36% of the total surface, and in 2025 €50,000 was allocated to expanding the gardens of building A0 (UJA 2025 Budget) (p. 5). This planning is complemented by the Urban Tree Management Plan, which prioritises plant species suited to natural conditions and maintains refuge areas for beneficial fauna and tree canopies for nesting, and by green spaces for biodiversity such as the native species garden of the province of Jaén, the 25th Anniversary Forest and the Experimental Garden (pp. 5–6).	
Does your university as a body have a policy to reduce the impact of alien species on Campus?	Yes	-
Evidence	Evidence url: https://www.ujaen.es/servicios/utecnica/objetivo-9-eleccion-de-especies-acordes-con-la-naturaleza (https://www.ujaen.es/servicios/utecnica/objetivo-9-eleccion-de-especies-acordes-con-la-naturaleza)	
Comment	The University of Jaén reduces the impact of alien species on its campuses through Objective 9, "Selection of species suited to natural conditions", of its Green Infrastructure Management Improvement Project, which includes the Urban Tree Management Plan and is part of its Environmental Sustainability Master Plan and Third Strategic Plan (PEUJA, revised in 2025). This objective sets out the selection of native species and requires new plantings to follow a holistic approach, using species with low water consumption, low maintenance and low exposure to pests and diseases, as well as species beneficial to bees, beneficial insects and natural predators. The gardens created in recent years on university premises comply with these criteria.

Comment	The University of Jaén collaborates with the Provincial Council of Jaén and the municipal councils of Bedmar, Huesa and Villarrodrigo on the BIOFORESTE project, "Bioeconomy in Municipal Forest Areas in the Eastern Axis of the Province of Jaén", funded with almost €2 million from NextGenerationEU funds. Led by the UJA's Global Change Observatory of the Sierras Subbéticas, it studies soil health and whether forestry machinery and regenerative livestock farming help fix carbon or stress the ecosystem. It includes a public awareness campaign in all the municipalities, also aimed at wildfire prevention. The results were presented on 16 December 2025.

Comment	The University of Jaén's Technical Instruction on Waste Minimisation 2025–2029, approved on 10 September 2025 (p. 1), sets guidelines to prevent water pollution from waste generated by its activities, especially hazardous laboratory waste, as this protects water sources and improves wastewater quality (p. 3). It prohibits disposing of waste down drains (p. 49), requires hazardous waste not to be mixed or diluted and to be packaged and labelled (p. 44), and stored with systems to contain discharges and spills (p. 45). It includes a contingency plan for spills of chemical substances or biological liquids (pp. 52–53).

Comment	The University of Jaén's Technical Instruction on Waste Minimisation 2025–2029, approved on 10 September 2025 (p. 1), sets policies to minimise packaging and plastic use: promoting agreements with suppliers to reduce packaging and plastic and buy in bulk, including packaging reduction in procurement specifications for all materials, maintaining the policy of not providing bottled water, and running awareness campaigns to reduce single-use plastics (pp. 26–28). Its targets are to make packaging waste reduction a mandatory requirement in 100% of procurement specifications by 2027 and to issue an instruction to spending units in 2026 to minimise packaging waste (p. 32).

Comment	The University of Jaén's Technical Instruction on Waste Minimisation 2025–2029, approved on 10 September 2025 under Law 7/2022 (pp. 1–3), regulates hazardous waste from its three producing sites (Las Lagunillas Campus, Linares Campus and Geolit) (pp. 7, 10): identification with European List of Waste codes, segregation at source in laboratories, packaging, labelling and temporary storage, collection by authorised waste managers, a ban on disposing of waste down drains, and a spill contingency plan (pp. 22–24, 45–53). It also provides for annual measurement of hazardous waste generation (6,204 kg in 2024), minimisation targets with deadlines, training and a technical monitoring committee (pp. 10–12, 30, 34–35).

Comment	The Statutes of the University of Jaén guarantee elected representation of undergraduate and postgraduate students, faculty (teaching and research staff) and non-teaching staff in its highest bodies. The Governing Council, the highest governing body, includes 16 members elected by the Senate: 10 faculty members, 4 students and 2 non-teaching staff (technical, management, administration and services staff) (art. 44, pp. 63–64). The Senate, the highest representative body, is elected by vote and has 186 faculty representatives, 84 student representatives and 30 non-teaching staff representatives (art. 37, pp. 58–59); undergraduate students vote by degree programme and postgraduate and doctoral students in their own constituency (art. 38, p. 59). Comment	The University of Jaén recognises the Student Council (CEUJA), the highest student representative body, which is independent and made up exclusively of students. It contributes to governance by conveying and defending students' interests inside and outside the university and promoting their presence in decision-making bodies. It provides student support: students can contact it for information and guidance and to have their questions, problems or complaints raised and heard. Throughout the academic year it also organises social and training activities open to students, such as conferences, themed weeks, assemblies and training for student representatives. Comment	The University of Jaén, through its Department of Public Law, offered the University Microcredential in Legal Protection of Andalusia's Natural Areas on 31 October 2025 at the Jaén Campus (1.5 ECTS credits, 50 places, free enrolment). It was aimed, among others, at directors and managers of natural areas and civil servants from the Regional Government of Andalusia and other public administrations, and was opened by the Regional Minister for Sustainability and the Environment. Its aim is to clarify the division of powers and the legal issues affecting protected natural areas across the different levels of government, and to present the European, national and regional legal framework and the administrative intervention mechanisms designed to ensure their effective legal protection.
